SpaceClaim 2009+ 3D Modeling Software for Engineers Selected Editor's Pick of the Week by *Desktop Engineering*

Advanced direct modeling software for engineers selected by Editor at Large.

DUBLIN, NEW HAMPSHIRE, USA — *Desktop Engineering* (deskeng.com) today announced that SpaceClaim Corp.'s (Concord, MA) SpaceClaim 2009+ 3D direct modeling software for engineers was chosen its Editor's Pick of the Week for January 13, 2010.

"SpaceClaim is a game-changer for your entire organization," says Anthony J. Lockwood, editor at large for *Desktop Engineering*. "SpaceClaim itself strives to be what the engineering community needs: An easy to use modeling tool that brings together the enterprise. It provides true direct modeling ... and interoperability with pretty much every format out there. What this all means is that SpaceClaim enables engineers and CAE analysts to collaborate, simulate, and bring together their expertise on a design from the concept stage and on up to detail and design-for-manufacture."

"By giving CAE and Styling a real 3D direct modeling system to work with, SpaceClaim speeds up your process by eliminating all sorts of delays and fostering multi-disciplinary collaboration," adds Lockwood. "SpaceClaim, at its core, is about individual and enterprise productivity. SpaceClaim can change the way you do business."

Desktop Engineering magazine, which is published monthly by Level 5 Communications, is an industry-leading media brand covering hardware and software engineering solutions for the manufacturing, medical, automotive, aerospace, consumer electronics, process, and other industries. Its readership of 63,000 is 100-percent involved in upfront design processes. *Desktop Engineering's* website, deskeng.com, is a valuable resource updated regularly with breaking news from the global engineering, design, and manufacturing industries.

"*Desktop Engineering* covers MCAD, simulation and analysis, reverse engineering, and rapid technologies for design engineers and engineering management," said Steve Robbins, executive editor. "We focus on computer technologies that enable 3D modeling and simulation."

"Each issue of DE offers news updates, hardware and software reviews, articles, and in-depth coverage of rapidly evolving industries," Robbins added. "DE delivers information that increases ROI and helps shorten time to market. Whether engineers are working on the latest aerospace project or an industrial designer is creating a new cell phone, DE provides solutions to their day-to-day challenges."
